

The project	Partnerships to achieve goals (SDG17)
Project Name:	Project (1) Organizing a celebration of The World Environment Day 2019
General Purpose	An important annual environmental occasion in which we express our moral commitment to preserving our resources and natural capital, and by celebrating it, we renew our determination to do more to protect our environment and achieve sustainable development goals, which represent one of the main elements of the Academy's strategic vision 2016-2021. We also seek, through this celebration, to document the close relationship between us and the local and international authorities concerned with preserving natural resources as an important part of our daily lives.
Description of the activity/project	Encouraging awareness and action at the global level in order to protect our environment. Each day of the World Environment Day is organized by choosing a topic that draws attention to the urgent environmental challenges in particular. The theme for 2017 is "Connecting People to Nature".
The Place of Event	The Arab Academy for Science, Technology and Maritime Transport – Abu Qier Campus
Partners	The Arab Academy for Science, Technology and Maritime Transport in collaboration with the United Nations Network for Global Agreements.
Number of Participants	10000
The Project's Results	World Environment Day is a day for everyone, celebrated everywhere. Since its inception in 1972, Global Citizens has organized thousands of events, from neighbourhood clean-ups, action to combat wildlife crime, to reforestation.
Indicators of Success	"Connecting people to nature" urges us to enjoy and protect nature, to appreciate the beauty and importance of nature, and to advance the call to protect the earth on which we all live.
Its Relationship to the objectives of the Arab Council of Ministers	The commitment to achieving sustainable development in the Arab region and the continuation of the implementation of the Arab initiative at the national and regional levels, building on the achievements made, working to confront the current challenges and introducing the necessary adjustments and directions to meet those challenges and to increase the effectiveness of the plans and programs concerned with achieving sustainable development.
